

# DER BUS

## We want to introduce - "DER BUS"

What you can see here, is the world largest luxury mobile home, registered in the Guinness Book of Records.

"Der Bus" is a unique rarity and has been described and explained in several books and publications. Our research has shown that this vehicle is the only kind of its species.

## A luxury oasis

The coach has been renovated and changed into "Der Bus" in several years of fine work (more than 20.000 working hours of German specialists). Therefore the whole vehicle was completely disassembled and totally renewed and covered with sheet metal.

In the upper deck a bedroom, a living room, a kitchen with a dining area, a guest berth and a bathroom are situated. In the lower deck next to the driver and eight passenger seats, a multifunctional conference area and an exclusive reception and bar are situated. The rear part is used as a garage and material storage room.

## And much more...

"Der Bus" offers you additional accessories which make travelling more comfortable and exciting -

there is a roof platform (17 metres by 2 metres), an exterior lightning system a sun-sail in the size of 220 m<sup>2</sup>, a huge video protection screen (9 metres by 5 metres), a projection installation for all current systems and a sound system and show lighting installation.

# DER BUS

## Definitely the largest - these numbers show it

- double-deck articulated coach manufactured by Neoplan
- Type: Jumbocruiser N138
- Length: 18 metres
- Height: 4 metres
- Width: 2,5 metres
- Total weight: 28 tons
- Turning circle: 24 metres by means of a guided trailing axle
- Serial number 1
- 12 cylinder V-type engine (Mercedes Benz)
- 440 Horsepower and 20910 ccm of the engine

The bus offers you a lot of advantages and possibilities.

The bus is made not only for travelling, but also for inviting guests, giving galas, making shows and presentations. Under the huge sunsail you can receive guests and on the large video wall you can present videos, photos and much more.

You can also use it for falconry - on the roof is a large terrace, which is an excellent vantage point.

"Der Bus" combines adventure, luxury and cosiness! Enjoy the ride!

*rarity*

- the engine room

You won't miss anything!

# DER BUS

## Only the best - in all areas

The passenger area is located in the front section and consists of a driver seat and 8 pleasant seats covered with black and yellow leather.

The entire instrument panel has been renewed and generously covered with a root timber laminate.

Next to the passenger area there is a VIP-lounge equipped with a bar of 5 metres length, top containers and black genuine timber blinds.

This was manufactured using different noble material like root timber, stainless steel, aluminium, artificial stone, mirror.

It offers running water, a refrigerator, sound and video projection set, pc-working place and a central control unit for the alarm and energy systems.

## *The setup and the furniture can be changed into your personal needs!*

Opposite there is a comfortable couch made of the same leather as the passenger seats. All windows are framed with root timber and can be closed with integrated curtains. The walls are made of white leather combined with aluminium. The floor is covered with structural genuine timber.

On the ceiling root timber elements have been assembled which were provided with chromium-plated low voltage lighting devices.

A palace on wheels - enjoy the ride!

The first bedroom is located in the upper deck front section. It is equipped with an electric adjustable bed (to level the bed).

The bed room is limited by swinging doors and contains two sideboards and an upper wardrobe decorated with off-white plates, framed, black oak edges and profiles.

You can find the living room in the middle of the upper deck next to the bedroom. It is equipped with two special conceived designer couches made of yellow fabric and black leather on stainless steel feet.

The walls are covered with off-white plates and the floor with grey carpets.

The special kitchen is located next to the living room and is manufactured in massive timber with blue and black and stainless steel resopal surfaces. The working plate is made of white grey artificial stone. It contains the refrigerator, the stove, the microwave oven and baking oven, dish washer and of course running water.

Moreover the air conditioning device and an alarm unit were integrated. In the dining area there is a table made of artificial stone and stainless steel with the corresponding chrome seats.

Next to the dining area there is also the front access to the upper deck.

The walls are framed with blue and stainless steel resopal with polished aluminium profiles. The floor is covered with siliceous resin design aluminium.

## A new way of luxury travelling

The live ring is located in the upper deck and links by means of articulation the front tractive machine and the rear part of the vehicle.

It is equipped with two round benches made of black leather and concertina walls made of grey velour.

On both sides the front tractive machine and the rear part can be separated with an integrated curtain.

The guest berth is located in the rear part of the vehicle in the upper deck.

It is equipped with a chaise lounge, a folding bed (2 metres by 2 metres) with black and off-white patterned fabric.

Floor and walls are covered with grey and off-white carpets.

You find the wonderful bathroom in the rear part of the vehicle's upper deck on the left side next to the guest berth.

The bathroom is completely tiled, the walls with white and black borders and the floor in black diagonal.

Integrated are: A large shower, a wash basin made of black and yellow laminate with chrome fittings and a ceramic toilette.

The bathroom can be closed with an integrated sliding door. Opposite to the bathroom there is the back access, leading into the rear part of the lower deck.

# DER BUS

## Everthing you want - needful things!

The storage room, which is completely covered with aluminium checker plates is located in the rear part of the lower deck. It contains a refrigerator, boiler, wash basin, working place, storage room, and a loading platform for a small vehicle, perhaps a Smart.

Besides the loading platform there are also two regular entrances into the rear part of the bus.

The engine room is the heart of the entire supply system and technology is installed in this room, for example the generator, transformer charging combination, batteries, vehicle batteries, vehicle supplementary and heating system.
